

PAS68 Static Bollards – OZTIME 40 SUPER SHALLOW MOUNT

The OZTIME 40 SUPER SHALLOW MOUNT is an ultra shallow foundation static bollard tested at Mira with the N2 7.5 ton vehicle at 64kph. This bollard requires a foundation depth of just 125mm meaning you can easily avoid all ground based services. The unique and simple nature used to connect the bollards means that it can be installed in cambers and gradients.

The OZTIME 40 SUPER SHALLOW MOUNT will protect any key facility from a vehicular based attack.
